Cavilon™

Antifungal Cream

Drug Facts

Active ingredient

Miconazole Nitrate 2%

Purpose

Antifungal

Indications

- Proven clinically effective in the treatment of most athlete's foot (tinea pedis), jock itch (tinea cruris) and ringworm (tinea corporis)
- For the treatment of superficial skin infections caused by yeast (candida albicans)
- For effective relief of redness, irritation, scaling, itching, discomfort and burning

Warnings

- **For external use only**
- Not intended for ingestion
- Do not use on children under 2 years of age unless directed by a doctor
- Avoid contact with the eyes
- For the treatment of athlete's foot and ringworm: If irritation occurs or if there is no improvement within 4 weeks, discontinue use and consult a doctor
- For the treatment of jock itch: If irritation occurs or there is no improvement within 2 weeks, discontinue use and consult a doctor
- For the prevention of athlete's foot: If irritation occurs, discontinue use and consult a doctor
- Do not use for diaper rash
- Keep out of the reach of children
- If swallow, get medical help or contact a Poison Control Center right away

Directions

- Clean the affected area and dry thoroughly
- Apply a thin layer of the product over affected area twice daily. As directed by a doctor or healthcare professional
- For athlete's foot: Pay special attention to spaces between the toes; wear well-fitting, ventilated shoes, and change shoes and socks at least once daily
- For athlete's foot and ringworm, use daily for 4 weeks. For jock itch, use daily for 2 weeks. If condition persists longer, consult a doctor

- This product is not effective on the scalp or nails
